

IMPORTANT: It is important to understand that the vehicle must be measured with the rear suspension as it would be if the completed vehicle was sitting on its tires on the ground.

IMPORTANT: Always measure vehicle with rear end supported on safety stands
The rear suspension should NEVER be hanging down.

Never use the hook on the end of a tape measure

What is the OVERALL LENGTH measurement from the end of the trans case to the flat surface on the pinion yoke as shown in drawing: _____ INCHES

How far does the OUTPUT SHAFT stick out past the end of trans case. Compress the seal if necessary _____ INCHES

Measure Between the 2 FLAT surfaces as shown in drawing _____ INCHES

Measure Between the 2 tabs circle one $3 \frac{7}{32}$ $3 \frac{5}{8}$

U-joint CAP DIAMETER for your pinion yoke. circle one 1.078 $1 \frac{1}{16}$ $1 \frac{1}{8}$ $1 \frac{3}{16}$
